SUMMARY

I majored in Electrical and Electronic Engineering at university while also taking mandatory Computer Science courses. Learning C programming in my first year sparked my interest in software development, leading me to explore deep learning with Python for my thesis in a multimedia lab.

After graduation, I honed my web development skills in Canada, specializing in React and Node.js. Since joining Yuyosoft, I've contributed to web applications using React and NestJS, as well as mobile app development with React Native. My quick adaptability to new technologies is one of my strengths.

I have also played a key role in setting up AWS environments, contributing significantly throughout the development process.

SKILLS

Languages

JavaScript, TypeScript, PHP, HTML, CSS

Frameworks & Libraries

React, Next.js, React Native, Expo, NestJS, Node.js, Express, Prisma, Tailwind CSS, Jest, Three.js, React Three Fiber, Stripe, PayPal

Tools & Databases

MySQL, PostgreSQL, AWS (EC2, ECR, ECS, S3, CloudFront, Lambda, RDS), Git, SourceTree
